SUMMER LEADERSHIP SERIES **NM ECHS** SESSION ONE: LEADERSHIP

AGENDA

- Introductions
- Overview and Focus on Leadership
- Research and Best Practices
- Group Discussion
- Sharing from Each Group Discussion
- Synthesis of the Session
- Overview and Closing

Introductions

Great schools do not exist apart from great leaders.

NAESP & NASSP, 2013

Research and Best Practices

Great schools do not exist apart from great leaders.

NAESP & NASSP, 2013

NM ECHS Technical Assistance and Support

NEW MEXICO EARLY COLLEGE HIGH SCHOOL

Educator Toolkit, Research, and Best Practices

Community of Best Practice

-Curate best practices
-Share information and outcomes
-Promote a shared vision and shared growth within the ECHS program

Resource

-Provide research

- -Tools
- -Common source of content

Collaboration

Promote leadership strategies
Provide a safe place for growth and development through community forums

WHAT RESEARCH SAYS ABOUT PRINCIPAL IMPACT ON LEARNING

Exhibit 1: Teacher and Principal Impact on Student Learning

Teachers and school administrators play significant roles in student performance. Walter, Marzano, and McNulty found that *principal impact accounts for 25 percent of the student learning.*

...based on a preliminary review of research, leadership is second only to classroom instruction as an influence on student learning. After six additional years of research, we are even more confident about this claim. To date we have not found a single case of a school improving its student achievement record in the absence of talented leadership.

Indeed, there are *virtually no documented instances of troubled schools being turned around without intervention by a powerful leader*. Many other factors may contribute to such turnarounds, but leadership is the catalyst. (Leithwood, Louis, Anderson, & Wahlstrom, 2004, p. 5)

Leadership Effective Strategies

"The principal's job is complex and multidimensional, and the effectiveness of principals depends, in part, on...how they allocate their time across daily responsibilities" (Rice 2010, p. 2)

Organizational

1 Effective instructional leadership combines an understanding of the instructional needs of the school with an ability to target resources where they are needed, hire the best available teachers, provide teachers with the opportunities they need to improve, and keep the school running smoothly. (p. 32)

School Turnaround

Indeed, there are *virtually no documented instances of troubled schools being turned around without intervention by a powerful leader*. Many other factors may contribute to such turnarounds, but leadership is the catalyst. (Leithwood, Louis, Anderson, & Wahlstrom, 2004, p. 5)

Community impact

03the quality of a principal affects a range of school outcomes including teachers' satisfaction and their decisions about where to work, parents' perceptions about the schools their children attend, and, ultimately, the academic performance of the school.

Vision

04

The "transformers" [the more effective principals] had an explicit vision of what their school might be like and brought a "can-do" attitude to their job.... [They] focused intently on creating a culture in which each child can learn. Giving up is not an option. (Johnson, Rochkind, & Doble, 2008, p. 3)

Additional Research

Leadership

Education research shows that most school variables, considered separately, have at most small effects on learning. The real payoff comes when individual variables combine to reach critical mass. Creating the conditions under which that can occur is the job of the principal. (Wallace Foundation, 2011, p. 2)

Using data from a study of North Carolina teachers, Ladd (2009) found that "school leadership emerges as the most consistently relevant measure of working conditions." (p. 29). School leaders improve teaching and learning indirectly and most powerfully through their influence on staff motivation, commitment, and working conditions. (Leithwood, Day, Sammons, Harris, & Hopkins, 2006, p. 5)

School leadership was the most important condition affecting teachers' willingness to remain teaching at their school. Teachers who indicated that they plan to remain teaching in their school were twice as likely to agree they work in trusting and supportive environments. (Hirsch, Sioberg, & Germuth, 2010, p. vii)

In a long-term study of Chicago schools, sociologists Anthony Bryk and Barbara Schneider showed that the single greatest factor in improving student achievement was trust among teachers and the principal. (Scribner, Hager, & Warne, 2002).

A Punctuated Equilibrium Model

	PHASE 1	PHASE 2	PHASE 3
		1890-1920	1990-2020
	Convergence #1	Recreation #1	Recreation #2
	1800-1890	1920-1990	2010→
Core values (purpose & mission)	Unitary Intellectual development	Differentiated Social efficiency Hold youngsters	Intellectual development Educate all youngsters
Strategy (learning & teaching)	Faculty psychology	Experimental psychology Behavioral perspective	Constructivist psychology Social-constructivist perspective
Structure (organization & management)	Craft management	Scientific management Hierarchy and bureaucracy	Transformational & instructional management Community-anchored organization
Control & distribution of power (governance)	Lay control	Government and professional control	Market-anchored control, direct citizen control, government control, & professional control

Changing conceptions of high school education, 1800-2010: A punctuated equilibrium framework (Murphy, 2006)

Group Discussion

Great schools do not exist apart from great leaders.

NAESP & NASSP, 2013

Participant Check-in and Reflection

Group Questions

Name, Role, School How are you?

In your role as related to the ECHS, what's your greatest leadership challenge?

Within your ECHS system, which includes all your partner organizations, what has been your greatest success in leading collaboratively?

Group Synthesis 1 Person from each group share:
